

LOCAL vs. REMOTE MSA HUB USAGE

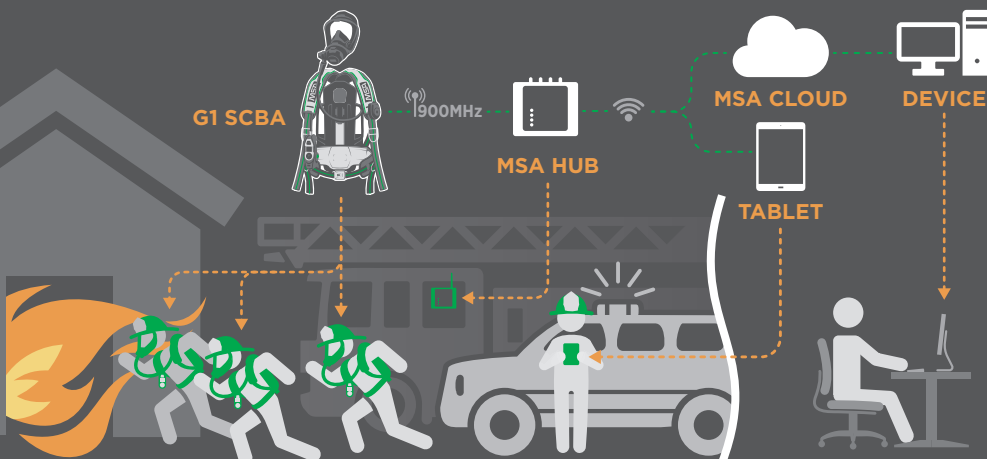

The MSA HUB is a new and exciting addition to the Connected Firefighter platform. The MSA HUB allows for wireless connection to a mobile device, cloud connectivity, Remote Monitoring, data retention, and increased reporting functionality.

FIGHTING A FIRE WILL NEVER BE THE SAME.

LOCAL COMMAND

MSA HUB can be used as a local system via a wired ethernet connection or a wireless connection to a laptop or tablet.

WIRELESS: WIFI

Linking to the internet using WiFi allows for connection to the MSA Cloud. This functionality introduces the use of Remote Monitoring, enabling additional eyes on the scene and seamless post-incident evaluation.
